## **BETA CARBON**

# FILTER CARTRIDGES ACTIVATED CARBON SINTERED BLOCK GRANULAR & IMPREGNATED

BETA activated carbon filter cartridges are available for a wide variety of applications. These cartridges can be used from standard water treatment removal of chlorine up to removal of specific components in a pharmaceutical application.

Sintered block coconut or coal based, rolled felt depth carbon impregnated cartridges and granular cartridges (PAC & GAC) all of which have excellent reduction characteristics and minimized carbon release. Please contact our specialists team for more technical details and the best advice.

#### **FEATURES & BENEFITS:**

- Manufactured from carbon powder block
- Avaliable in 10" up to 40" (standard size) and big blue
- Up to 1110 g carbon per 40"
- Low pressure drop, great adsorption capacity
- Available also with granular carbon & impregnated cellullose/polypropylene rolled felt.
- Several length and end cap configurations possible.

#### **APPLICATIONS:**

- Chlorine reduction
- Taste, Color & Odor removal
- Organic reduction
- Water treatment
- Pharmaceuticals
- Chemicals
- Food & Beverage
- Metal finishing
- Potable water
- Industrial water treatment
- Hydrocarbon reduction

#### **TECHNICAL DATA:**

#### **Materials of Construction:**

**Filter media:** carbon powder, **End caps:** PP, DOE and SOE, polyethylene netting.

Gaskets: EPDM, silicone, viton,

NBr, FEP, Buna-N.

#### **Available Lengths:**

Length: 10", 20", 30" & 40", big blue 10" & 20" and customized sizes.
OD: 68 & 115 mm
Micron rating: 5 µm

### Recommended Maximum Operating Conditions:

Temperature: 52°C max Flowrate: recommended 3.8 lpm/10" (@ 115mbar dP) and 7.6 lpm/10" Big

Blue (@ 115 mbar dP)

Change out dP: max. dP: 2.5 bar
